Post

A brave independent lab tested 5 common childhood vaccines and EVERY SINGLE ONE came back POSITIVE for glyphosate, the toxic, cancer causing ingredient found in Roundup!

These vaccines showed contamination across the entire board.

The MMR vaccine had levels 25x higher than all the others likely because it's a live virus vaccine stabilized with 25% gelatin from pigs fed GMO grains heavily sprayed with glyphosate.

They're directly injecting carcinogens into our children, bypassing natural defenses while Big Pharma and the corrupt system push their tyrannical mandates!
